Size: 27 x 41 inches
Price: SOLD

Description:

19th South Florida Aviation Map

Detailed aeronautical map of the South Florida region.

The chart is a font of information about civil and military aviation immediately after WWII. It was intended for civil aviators flying by visual navigation and so includes data that would be useful for this purpose.

Topographical information consists of relief and a judicious selection of visual checkpoints used for navigation under visual flight rules. The checkpoints include populated places, roads, and distinct landmarks. The aeronautical information includes visual and radio aids to navigation, airports (aerodromes, both for landplanes and seaplanes), controlled airspace, restricted areas, and obstructions.
