**Date:** 1806  
**Place:** London  
**Color:** Hand Colored  
**Condition:** VG  
**Size:** 20.5 x 18 inches  
**Price:** SOLD

### Description:

Fine example of the first edition of Cary's map of the Southern United States and Bahama Islands, extending the East Coast to the Mississippi River and from Tennessee and the Carolinas to Florida, the Bahamas and the Gulf Coast.

A massive Georgia extends from the Atlantic to the Mississippi River, as it existed immediately prior to the creation of Mississippi Territory (created in 1798, but not widely depicted on maps for another decade). Many remarkable notes are present, including the hunting grounds of the Western Party and Six Villages along the Mississippi and the Eastern Party due east thereof, between the Yasoo and Tombechbe Rivers, notes regarding the destruction of Chatchioomas and Fort Francois in 1736 and 1729 respectively, and a host of other interesting notes in Western Georgia. The region controlled by the Chickasaws and Upper Creeks names dozens of villages and other places and includes early roads. The Cherokee region is also well depicted. Many roads are shown in the Carolinas and some in Tennessee as well. Many early forts are depicted.

The map provides an excellent treatment of East and West Florida, the latter of which was still under Spanish control until 1812, although claimed as part of the Louisiana Purchase in 1803. In Florida, Fort St. Marks, Apalacha Fort, and the roads across from St. Augustin are shown, with a note that the Apalachees Villages are now deserted. Southern Florida is Ancient Tegesta and The Promontory. A Lake and River system connects Mayaco Lake with the St. Johns River.
