Condition: VG
Size: 22.25 x 19.5 inches
Price: \$3,500.00

Description:

One of the Earliest Dutch World Maps To Focus on a More Modern Cartographic Style

Striking scientifically constructed map of the World, based on Carel Allard's map of 1696.

Shirley's describe's the Allard map as follows:

The traditional decorative border of many seventeenth-century world maps has disappeared, and ... [the] twin central hemispheres are surrounded by eight smaller projections depicting the world from various angles, and four smaller circular diagrams. The dark cross-hatched background provides a striking contrast.'

This map represented a noteworthy shift from the traditional decorative Dutch 17th-century maps where the margins would be full of classical mythological figures and references. Here we have a more strictly scientific approach with only a handful of cherubs parceled in between the two largest hemispheres.
