Description:

Interesting small double hemisphere map of the world, published by Daniel de la Feuille in Paris.

The map shows the island of California, a large landmass in Antarctica, and a partially mapped Australia.

In North America there is a large amorphous depiction of the Great Lakes region. In the North Pacific the T. de Jesso coastline stretches between Asia and North America. The Great Wall is shown in China.

Includes a massive unknown southern continent and marvelous incomplete depictions of Australia and New Zealand, based upon Abel Tasman's discoveries.
