Description:

Fine set of views from Francois Valentijn's *Oud en Nieuw Oost-Indien*. The views show various trading posts in the Maluku Islands as seen from the sea.

One view is set on the island of "Boero," now known as Buru, south of the Banda Arc in the Maluku archipelago. The bottommost view shows a massive fort overlooking a jungly expanse. A plan of the fort is shown in an inset.

Overall, the views are attractive and designed to show the might of Dutch trading during the 18th century.

Oud en Nieuw Oost-Indien

After spending sixteen years in the East Indies over the course of several voyages, Valentijn returned to his native Dordrecht. There, he finished his history of the East Indies, *Oud en Nieuw Oost-Indien*. The book was divided in five parts spread over eight volumes. It had over a thousand illustrations, including some of the most accurate maps of the region published to that date.

For the text, Valentijn borrowed heavily from contemporary works. To create such detailed maps and descriptions, Valentijn most likely also had access to the VOC's archives. These archives were closely watched and very few scholars or officials gained entry, particularly if they were likely to publish the contents of the repository. Indeed, Valentijn was lucky to see his work published at all.

Today, Valentijn's work is regarded as a veritable encyclopedia on maritime Asia. It is considered a useful collection of sources, from the eighteenth century and earlier, drawn from the VOC and personal papers. Some of his maps, particularly those of Australia, are drawn from manuscript sources now lost, making his history the lone surviving record of endangered knowledge.
