Description:

Charming pictorial map of Orlando, from Harvey Hutter & Co's "A View of the World" series.

A small New York skyline in the left foreground gives way to feature major landmarks of Orlando, including downtown, Disney World, Sea World, and Lake Eola. The Space Shuttle *Atlantis* is shown being launched from the Kennedy Space Center. The extreme southward view continues down Florida, from Palm Beach, Miami, and the Everglades, to Cuba, Brazil, the Falkland Islands, and the South Pole.

The present view is one of a large series of images that riffed on the Steinberg concept while substituting other American and worldwide cities. Steinberg's original work has been the subject of almost-countless parodies, including one for the release of *Moscow on the Hudson* by Columbia Pictures, which resulted in a copyright infringement lawsuit.
