### Description:

Interesting early regional map centered on the Oder River, published by Sebastian Munster.

Sebastien Munster is generally regarded as one of the important mapmakers of the 16th Century. Munster was a linguist and mathematician, who initially taught Hebrew in Heidelberg. He issued his first mapping of Germany in 1529, after which he issued a call for geographical information about Germany to scholars throughout the country. The response was better than hoped for, and included substantial foreign material, which supplied him with up-to-date, if not necessarily accurate maps for the issuance of his *Geographia* first issued in 1540 and later in his *Cosmographia* first issued in 1544.
