Description:

Rare color-lithographed folding map of the Plant System of railway, steamer, and steamship routes to Florida and beyond.

The map is composed of two images one more detailed and larger map of Florida, and another inset of the eastern United States. Inset views of early Florida resorts are sprinkled around the map.

The Plant System was responsible for numerous colorful and attractive maps of Florida around the turn of the 19th century, though the individual titles are themselves quite rare.
