**Date:** 1715  
**Place:** Paris  
**Color:** Outline Color  
**Condition:** VG  
**Size:** 19.5 x 14 inches  
**Price:** SOLD

### Description:

Intriguing original antique map of Anatolia and Asia Minor, showing the geography of the region as it was in Classical times. With the Black Sea visible in the north and the Aegean Sea visible to the west, the map names a number of Roman- and Greek-era cities within the region.

To the left of the map is a breakdown that appears to be the organizational structure of Turkey in ancient times. There are four organizational levels. One particular feature of interest is the city of Chalcedonis shown across from Constantinople.

This is an uncommon map, and it is the first time we have offered it for sale.

### Detailed Condition:

Original hand-color in outline. Minor offsetting. Engraved toponym sheet onlaid to left margin.
