**Description:**

Decorative map showing the wanderings of the Apostles throughout the Holy Land and the Eastern Mediterranean, with various explanatory notes. Includes a large inset of the Holy Land and a town plan of Jerusalem, based upon Villalpando. The map has been backed on linen and folded into quarters. There is trimming to the right and left margins, with loss of the neatline on the left and some loss on the right. The map is also a bit soiled and abraded. In all, still a good example of this scarce biblical map, which would ordinarily sell for about \$500 in better condition.
