**Map of the City of Denver -- To Accompany the Annual Report of the City Engineer of  
Denver, Colo. 1890**

**Stock#:** 83832  
**Map Maker:** Denver Litho Co.  
**Date:** 1890  
**Place:** Denver  
**Color:** Hand Colored  
**Condition:** VG+  
**Size:** 22.5 x 29 inches  
**Price:** \$ 1,600.00

**Description:**

***A Denver Rarity***

Rare large map of Denver, issued in 1890 by the City Engineer to illustrate the work on Denver's storm drain system.

While the map is titled as accompanying and annual report, our research shows that it was likely only issued in 1890 and done in two formats, one to illustrate the area drained by Storm Sewers and a second showing the future total area to be covered upon the completion of the Delgany Street sewer, which was completed in 1892.

The present example shows the location and extent of the Sewer Districts by color coding.

**Map of the City of Denver -- To Accompany the Annual Report of the City Engineer of  
Denver, Colo. 1890**

A rare map for the city showing the latest additions and developments. Includes detail for "River Front Park" along the Platte, which would later be wiped out in a flood. Still shows Lake Archer further upstream, with an island in the lake.

Shows Cherry Creek as still mostly unreclaimed river channel. Spans from Smith Lake near present day Washington Park, and reaches up to "North Highlands" and "Swansea"

The map bears a copyright date of 1887 and the name W.B. Gray.

**Rarity**

OCLC locates 4 examples of the map.
