[Rome / Controlling The Tiber River] Parer di Gio Paolo Maggio Archit Sopra l'inondation di Roma

Stock#: 85891
Map Maker: Maggio / Thomassin
Date: 1608
Place: Rome
Color: Uncolored
Condition: VG
Size: 20.5 x 15.25 inches
Price: \$ 6,500.00

Description:

The Opinion of Architect Giovanni Paolo Maggio To Prevent The Flooding of Rome -- Dedicated to Camillo Borghese, Pope Paul V

Fine example of Giovanni Paolo Maggio's extremely rare map addressing the flood control problems faced by Rome and environs. In 1606, he first wrote his "Brief speech [...] to prevent the flooding of the Tiber to the city of Rome". In his "Proposal [...] to remedy the flooding of the Tiber "(Vatican Apostolic Library, Chigi H.II. 43, ff. 168e ff.) he proposed to creation of a canal, which would drain part of the waters of the Tiber River, with an estimated cost of 39,000 scuti.

The plan is accompanied by text section with architect Maggio's observations on the opportunity to divert the Tiber at several points in order to avoid flooding, which has been engraved by master engraver Philippe Thomassin.

Oriented with west at the top of the, the map tracks the course of the Tiber River from its confluence with the Aniene and Prati di Quinto to Monte Testaccio and the Porta Portuense and Porta Osienne, illustrating the ancient monuments, walls, city gates, major hills, roads, buildings and other major sites. The course of the proposed Canal (Novo alveo che disegna farsi), connects the Tiber from a point south of today's Ponte della Musica to a point on the river just south of Castel San Angelo.

Rarity

We locate a single example in the Biblioteca Nazionale Centrale Di Roma.
