### Description:

#### ***Early depiction of the proposed Transcontinental Railroad routes!***

Fine treatment of the American West seen through the lens of a Republican newspaperman traveling through the continent after the end of the Civil War.

This 1866 edition of Bowles's work, first published in 1865, includes a marvelous map of the western states showing stage roads and proposed railroads across the continent. An inset in the lower right shows a focus on central California.

The book includes an extremely detailed description of the West, describing many aspects. The subjects covered include polygamy in Utah, winemaking in California, the high coastal cost of living, and much more.

One of the most interesting parts of the book is its interactions with Schuyler Colfax's trip across the continent. Colfax, then Speaker of the House, was visiting the western states. He was one of the first high-ranking elected officials to do so.
