Description:

The Roman Roads of the Iberian Peninsula

Rare map of the Iberian Peninsula in the time of the Romans, published by De Vaugondy in Paris.

The map illustrates the ancient Spain at the time of the Romans. The map notes that the the peninsula is divided in four ways:

- 1°. into seven provinces, of which the province called Tingitana is situated in Africa
- 2°. and 3°. into the Citerior and fourteen councils from Pliny.
- 4°. and into different peoples, according to Ptolemy

The map shows the Roman roads described by Antoninus.

Rarity

The map is apparently quite rare on the market. This is the first example we have ever seen.
