Description:

This map is a rare variant of Jacques Nicolas Bellin's map normally titled "Carte De La Louisiane et Pays Voisins." In this variant edition, the title includes the name "Floride" in the title.

This map provides detailed information about the interior of the present-day United States on either side of the Mississippi River. It is based on De L'Isle's folio map of the region, and it includes information about early French forts and other settlements. The map also shows the exploration and settlement of the region west of the Mississippi, including forts, Native American villages, and other place names.

One of the key features of the map is its depiction of the unknown region in northern Texas and the Native American territories between the Mississippi and the Rio Grande. This area was not well understood by Europeans at the time, and the map provides valuable information about the first settlements in this region along the Gulf Coast and in the interior of Texas. The map also shows the courses of a number of rivers, including the Mississippi, providing valuable information for travelers and explorers. Overall, this is a fascinating and historically significant map of the Mississippi River Valley and its surrounding areas.
