Description:

Striking map of the United States and Canada, apparently issued in a very late edition of Zatta's *Atlante Novissimo*, first issued in 1778. The map has been substantially updated, although the geopolitical border of the US States are a bit curious. Included among the states and territories are Cherachesia, Alta and Bassa Luigiana Inglese and a massive projection of Ohion, extending to the Mississippi River, one of the only known maps to so exaggerate Ohio's boundaries. The map retains an odd projection of the Great Lakes which is now at least 40 years outdated. Florida is shown as an oddly shaped archipelago, again a very late and unusual variant of this misconception.
