### **John McFadden**

John McFadden came to California with his family, including brothers James, Robert and Archibald in the 1860s and 1870s.

John McFadden first worked as a school teacher for a year in Grass Valley, California, and then joined his brothers in their business in present day Orange County, California. The McFadden brothers established McFadden's Landing (now named the Newport pier), a pier and railroad, at the area now known as Newport Beach, where merchant sailing ships docked with their cargos. The brothers were also early investors and farmers in the future Orange County.
