Description:

Highly detailed map of the coast of Africa, from the Straits of Gibraltar to Cap Bojador, and including the Canary Islands and Madeira. These large coastal charts were issued separately and in the Hydrographie Francoise, and represented the best and most detailed charts of the seas and coasts of the world then available. The map includes remarkable coastal and topographical details, soundings, rhumbines, and a host of navigational details. Printed on thick laid paper. Four inch fold split, but overall a nice example, with an attractive cartouche.
